Shamir and Peres Confirm Accord on **Unity Government**

By James Feron New York Times Service

JERUSALEM — Israel's top political leaders confirmed Wednesday that they had reached basic agreement on a bipartisan govern-ment and moved to another stage of negotiations: who would get

which post in the cabinet.
The leaders, Shimon Peres of the Labor alignment, and Prime Minister Yitzhak Shamir, head of the Likud bloc, were reported to have agreed that 10 portfolios would go to each political camp.

But it also appeared likely that the cabinet would be larger, leaving positions for smaller parties that may join the national unity government under formation.

Eight of the 15 parties in the Knesset, Israel's parliament, al-ready have agreed to join the bipartisan effort, or to back it from outside government ranks. The eight parties represent 92 of 120 seats in the chamber.

With basic agreement in place, meanwhile, the day was filled with political scurrying, the major par-ties matching names with portfolios and the smaller parties seeking places in the cabinet.

The two leaders met twice, at Mr. Shamir's home and his office, staying out of the public spotlight that had characterized earlier talks in the King David Hotel.

Mr. Peres said after the first session that "we've overcome the outstanding issues between us and started to deal with the structure and composition of the future cabi-net." He said he thought the task could be completed by Friday.

Mr. Shamir was a bit more cautious, saying there also were "pending problems in the political guidelines" being drafted. He was more optimistic after the second meet-

ing, saying he saw "no obstacles." Although radio accounts of cabinet positions fluctuated during the day it was agreed that Mr. Peres would be prime minister for the first half of the 50-month govern- ly recognized them.

ment and Mr. Shamir deputy prime minister and foreign minister. Then their roles would be reversed.

Yizhak Rabin, the former Labor. prime minister, will be defense minister for the full term, but will have a Likud member as deputy. presumably to monitor policy on Jewish settlements in the occupied West Bank.

Victor Shemtov, head of the Mapam faction of the alignment. which opposes working with Likud, described the coalition as "based on two opposing blocs, each enjoying a veto --- a prime minister without a majority in the cabinet."

Mapam has indicated that its six members will leave the 44-member alignment once the coalition is formed. The rightist Tehiya party, a member of the last Likud coalition, similarly plans to leave if the bipartisan government, as indicated, does not continue a policy of building settlements in occupied

Groups in favor of such development spoke angrily during the day of what they saw as an intended freeze of settlement policy, and in-dicated they would return to an earlier tactic, the establishment of unauthorized settlements.

Yuval Ne'eman, head of the Tehiya party, said that "we will not be deterred" and that "settlement will continue in the private sector." Elyakim Haetsni, a spokesman for settlement groups, said in a radio

ish government did in 1939, to say in this area no Jewish settlements. It's a white paper, and against a white paper as we learned from our fathers, you fight with settlements. We shall continue the settlement

Dollar Advances To New Records

The U.S. dollar continued its record-breaking advance Wednesday on foreign ex-

change markets in Europe. The dollar surged to record levels against the French, British and Italian currencies, an l 1½-year high against the West German mark and a 10-year high against the Dutch guilder.

The British pound was quoted at \$1.2825, down from Tuesday's late rate of \$1.2927. Other late dollar rates in Europe compared with late rates Tuesday included: 2.947; Deutsche marks, up from 2.9245; 9.0355 French francs. up from 8.9500; 3.3275 guil-ders, up from 3.3000. Page 7.

U.S. Army in Germany Is Upset Over Anti-Soviet Poster Prank

The Assistated Press

FRANKFURT - The U.S. Army says it is trying to find the ioldiers who designed a poster saying, "We're Here to Kill Russians." Sergeant Edward J. Rolph said Tuesday that 10 copies of the color poster were printed and one was given as a farewell present to Major General Charles F. Briggs last month. Sergeant Rolph, a spokesman for U.S. Army Europe headquarters

in Heidelberg, said the command has ordered an investigation to determine who designed the poster, where it was printed, what happened to the remaining copies and who sent one to Der Spiegel magazine. The West German newsweekly published a copy of the poster under the headline, "Bad Things."

Investigators have not determined which soldiers were responsible and "there is no way to speculate what kind of disciplinary action will

be taken, if any," Sergeant Rolph said.

Der Spiegel linked the poster to President Ronald Reagan's controversial joke about bombing the Soviet Union. "This form of superpower joke, which American President Ronald Reagan made popular with his microphone test, seems to be catching on in the U.S. Army, the magazine said,

Iraq to Continue Attacks In Gulf, Official Says

as Iran threatens its ports, Iraqi Foreign Minister Tariq Aziz said

Mr. Aziz, speaking at a news conference after talks with West German leaders, said, "As long as Iran continues to hinder Iraq's use of its own ports, we will continue to hi; Iranian ships and facilities." On another issue, a spokesman

Salvador Officer Gets a New Post

SAN SALVADOR - An army colonel who rebelled against the defense minister last year is back in command of troops in an area of El Salvador that is a guerrilla stronghold, a military spokesman said.

Colonel Sigifredo Ochoa Perez, who returned recently from the In-ter-American Defense College in Washington, was named com-mander of the 4th Infantry Brigade in Chalaterango province, the spokesman, who asked not to be identified for security reasons, said Tuesday, Rebels have moved freely through Chalatenango, 43 miles (69 kilometers) northeast of San Salvador, since the start of the nearly five-year civil war.

Colonel Ochoa rebelled in January 1983 when the military high command ordered him transferred from chief of the armed forces detachment in the north-central province of Cabañas to military attaché in Uruguay, considered a minor

BONN — Iraq will continue to attack shipping in the Gulf as long as Iran threatens its root for the West German Foreign Ministry said that Mr. Aziz had agreed to allow Bonn to inspect a West German-supplied pesticide plant that U.S. intelligence sources said could be adapted to make nerve

gas.
The spokesman said Mr. Aziz agreed to the inspection in talks with Foreign Minister Hans-Dietrich Genscher. Procedures and the date for the inspection were still to

be worked out, the spokesman said.

A United Nations mission in March of this year established that chemical weapons had been used against Iranian troops but stopped short of indicting Iraq by name. Mr. Aziz on Wednesday repeated denials that Iraq had used poison gas at any time during its four-year war with Iran.

Mr. Aziz also said he told Chancellor Helmut Kohl that Iraq hoped members of the European Community would do more to bring about a peace settlement be tween Iraq and Iran. For example, he said. Iraq would like to see an end to any form of economic aid that contributes to Iran's military

strength.
"The present Iranian leadership is not susceptible to logic or persuasion. It will only stop when it is no longer able to carry on the war and is threatened by destabilization,"

Reagan to Pick Trade Aide The Associated Press

CHICAGO - President Ronald Reagan plans to nominate Mary L. Azcuenaga, a Federal Trade Commission lawyer, to succeed Michael Pertschuk as an FTC commissioner. it was announced Wednesday.

Explosion Damages S. Africa Power Station

SHARPEVILLE, South Africa a bomb damaged a power station police. Wednesday and police fired rubber bullets to disperse crowds of black youths rampaging in townships where 29 people have died in three days of rioting triggered by rent

After the power station blast, a second bomb discovered by a security officer in a broom closet of Johannesburg's Supreme Court was safely detonated by explosives experts, police said.

No one claimed responsibility for either explosive device or for a blast Monday that injured four persons and wrecked the offices of the Department for Internal Af-

fairs in central Johannesburg.
Police fired rubber bullets at youths stoning vehicles and buildings around Sharpeville, 50 miles (80 kilometers) south of Johannesburg, and in nearby Sebokeng, where a gas station was set ablaze, a police cookerman said. A police police spokesman said. A police anti-riot vehicle was struck by gun-fire along the highway between the two townships, the spokesman

Officials at Sharpeville's Sebo-keng Hospital were ordered by police to withhold casualty figures, sources said hundreds of people had been treated and mattresses were laid out on the floor.

Several hundred black residents carrying white flags stood outside the Sharpeville municipal offices demanding talks with officials about 10 percent rent increases.

of Soviet origin was detonated, shattering windows of nearby buildings and plowing a crater in the courthouse lawn, said Lieutenant Pierre Louw, a police spokes-

The earlier blast damaged trans-formers at a power station near Rustenburg, cutting electricity to five towns and a large region of the northwestern Transvaal province. Police said they were treating the blast, 50 miles northwest of Johan-

esburg, as sabotage. The violence Wednesday came as white, mixed-race and Asian lawmakers in Cape Town sat together for the first time to elect as state president Pieter W. Botha, the former prime minister and sole nominee. The colored and Indian lawmakers, elected last month in polling marred by arrests and violent demonstrations, were sworn in Tuesday to segregated chambers alongside the dominant white House of Assembly.

At least 40 people have been arrested in the violence that began mandate by the United Nations in after thousands of blacks stayed 1966.

home Monday to protest the rent increases, said Lieutenant Henry -An explosion believed caused by Beck, a spokesman for the national

Monday's violence in townships near Johannesburg coincided with the introduction of a new constitution putting mixed-race, or colored, and Indians into Parliament, but formally excluding South Africa's 22 million black majority.

Twenty-nine people have died in the violence including at least 10 people shot in "police countermea-sures." Lieutenant Beck said. Others died in fire-bombed cars and houses or were killed by rioters.

At least four of the dead were black local officials who were probably targeted because they were seen as cooperating with white au-thorities, Lieutenant Beck said.

Crocker Finishes U.S. Policy Tour To Black Africa

United Press Internation NAIROBI - The assistant secretary of state for African affairs, retary of state for African arians, Chester A. Crocker, completed a swing through Africa on Wednesday saying he was bringing home reconciliation with Uganda and "possibilities of real progress" on the problem of independence for South-West Africa, or Namibia.

Mr. Crocker concluded his for-Hundreds of onlookers at the Jo-hannesburg Supreme Court were with President Daniel Arap Moi of shooed away as a magnetic bomb Kenya to discuss U.S. aid to the country and other regional issues. He was to leave for London late

Wednesday or early Thursday. He promised that the United States would provide Kenya with an additional 67,000 tons of emergency food relief in addition to the \$15 million agreed in the previous two months. The United States has provided \$800 million in aid to Kenya in the past 25 years.

His talks with Mr. Moi followed s 24-hour visit to Uganda, where Mr. Crocker pledged continued U.S. support for the regime of President Milton Obote despite State Department allegations last month that the Ugandan Army has slaughtered up to 200,000 civilians in the past three years.

During his weeklong trip, Mr. Crocker also made stops in South Africa, Zambia and Tanzania 10 discuss U.S. efforts to negotiate independence for Namibia - a process that has been continuing since the withdrawal of South Africa's

Mine Hunt By U.S. Navy In Suez Seen **Ending Soon**

By Bernard Gwertzman New York Times Service

WASHINGTON - The United States will probably complete its minesweeping operations in the Gulf of Suez and the Red Sea in about 10 days and leave the area, according to State Department of-

They said Tuesday that the four navy helicopters aboard the amphibious transport dock Shreveport that have been operating in the Gulf of Suez would have completed their mission by then. About 200 U.S. servicemen are involved in the

Another U.S. contingent consisting of three minesweeping helicop-ters aboard the La Salle, a command ship, has been searching for mines in the Red Sea off Jidda, Saudi Arabia. State Department officials said they expected these helicopters to leave the area in 10 days also. The Saudis have already said that their waters have been found free of mines.

Other minesweepers have been The bomb also may have been contributed by Britain, France and stended for Prime Minister Ra- ludy. The Netherlands also has two minesweepers due to arrive in the area soon. The Soviet Union is conducting a separate minesweeping operation at the southern end of

the Red Sea near Aden.
U.S. officials said that they assumed the other nations' ships would be leaving the area at about

the same time as the Americans. So far, no minesweepers from any of the nations assisting Egypt though 17 ships have been damaged since July 9. There have been no reported explosions in the Suez Canal itself.

U.S. officials said there might be many reasons why no mines had

As to those responsible for the mine-laying, speculation continues to point to Libya, State Department officials said. The Libyan ship Ghat, which passed through the Suez Canal, traveled into the over most of the city and local Red Sea, unloaded cargo in Ethiopia and then returned, took 14 days to complete the trip which normally takes less than four days.

However, French officials who The Libyans are known to have

purchased mines from Italy, U.S. officials said, and it is presumed that, if Libya was responsible, the mines were of Italian manufacture. A State Department official said, red windows over a wide area.

quoted Rear Admiral Dominique Lefebvre, the commander of the French naval forces in the Indian Ocean, as having said that all the ships damaged in the Red Sea were in depths of at least 300 feet (91

He said that the mines were apparently of a type that can be plant-ed on the seabed and can be activated by the passage of a ship overhead. When they explode, they create a sudden increase in water pressure under a ship's hull, setting off vibrations that are violent but not sufficient to crack the hull.

The explosions were all minor. according to Egyptian authorities, and caused no injuries. No ship sank as a result of the explosions.

Romania Outlines **Broad Goals for** Next 5-Year Plan

VIENNA - Romania has set itself ambitious industrial and export targets in its next five-year plan, details of which were pub-lished Wednesday by the news

agency, Agarpres.

Although Romania has one of the poorest living standards in Europe, domestic consumption again takes a low priority. But the agency said living standards will be main-tained and wages will rise.

The draft plan, covering 1986-1990, aims for a rise in national

income, roughly equivalent to gross national product, of 7.6 percent to 8.3 percent a year, the agency, monitored here said. But the increases will come from

higher productivity — to rise by 10 percent a year on average — rather than increased investment, which will grow by only 1.8 percent to 2.5 percent annually The volume of foreign trade (imports plus exports) is scheduled to

grow by 41 percent to 45 percent over the period, with exports rising by 52 to 56 percent.

Soviet Satellites Launched United Press Intern

MOSCOW - The Soviet Union has launched three Cosmos satel-

Philippine Storm Toll Climbs to 543

MANILA (AP) — The death toil from a typhoon in the Philippines rose to 543 people on Wednesday as reports of destruction trickled infrom isolated areas. Scores of people were missing and at least 200,000

were nomeress.

Most of the fatalities were in the southern province of Surigao del Norte, which was hit hardest by winds that reached 185 kilometers per hour (115 mph). The typhoon, designated lke, has moved into the South-China Sea and storm warnings have been issued for northeastern Thailand, Vietnam, Laos and Cambodia.

In South Korea, meanwhile, the death toll from flooding in another storm rose to 139. Officials said 45 others were missing. Earlier reports had listed 160 dead.

More Talks Foreseen on Hong Kong

BEIJING (Reuters) — Britain and China will require at least one more, round of formal negotiations before they conclude an agreement on the handover of Hong Kong, sources close to the talks said Wednesday.

The sources said that the talks were on target for an agreement by the end of the month but that several key issues remained to be resolved, including three mentioned by the British foreign secretary. Sir Geoffrey Howe, after his visit here in July. They are what passports Hong Kong residents will use after 1997, when Britain's lease on much of the crown colony expires, aviation rights and a policy on land sales in the 13-year transition until the turnover.

Negotiators opened the 22d round of formal talks here Wednesday morning. They are due to continue Thursday. A joint working group has been meeting almost round the clock during the last few days to i

Vatican Denounces Boff's Writings

VATICAN CITY (Reuters) — The Vatican said Wednesday that ideas propounded by the Reverend Leonardo Boff, a Brazilian advocate of the "theology of liberation" who has been summoned to the Holy See to

explain his views, were a threat to the Roman Catholic faith. A statement issued here implied it was Father Boff's writings on the structure of the church that were at issue and not those on liberation theology, which sometimes uses Marxist analysis, and which itself was

sharply criticized in a Vatican directive issued Monday.

The statement Wednesday reaffirmed that Father Boff would be interviewed on Friday by the Congregation for the Doctrine of the Faith.

Spanish Vessel Ordered to Morocco

ARRECIFE, Canary Islands (Reuters) — Spanish authorities, after contacting their Moroccan counterparts, have ordered a Spanish fishing boat, that was boarded by two armed Moroccan coast guardsmen, to sail to Morocco and surrender to authorities there, Spanish officials in

Arrecife and Madrid said Wednesday.

The fishing boat, the Santa Teresa de Jesus, arrived Monday in Arrecife. The captain, Juan Bantista Sanz, said that he had been stopped by a patrol vessel for allegedly fishing in Moroccan waters and that the two coast guardsmen had come on board.

They ordered him to head for the Moroccan port of Agadir bu; apparently because he lacked sufficient fuel, he sailed to the Canaries instead.

Weather Halts Salvage of French Ship

OSTEND, Belguim (AP) — High waves on Wednesday ripped away part of the hull of a sunken French freighter containing radioactive cargo and three empty containers floated out to the North Sea before they were

picked up by salvage workers, officials said.

For the third straight day, rough weather halted salvaging of the Mont-Louis's cargo of 30 containers filled with uranium hexafluoride. Salvage workers cut a giant hole in the 4,210-ton freighter to retrieve the containers, but recent high waves have enlarged the hole, said Henk

Drenth of the Dutch salvaging company Smit International. The Mont-Louis was on a routine voyage to the Soviet port of Riga, where its cargo was to be enriched for use in West European power plants, when it collided on Aug. 25 with a North Sea passenger ferry and sank. It is lying on its starboard side, 19 kilometers (12 miles) off the Belgian coast in 14 meters (15 yards) of water at low tide when its hulk is partly visible.

24-Hour Hyderabad Curfew Extended

NEW DELHI (Reuters) — A round-the-clock curfew imposed on the Moslems was extended Wednesday for 24 hours to head off further

violence, the Press Trust of India said. The agency said 23 people were injured Monday night during a religious procession. The curfew closed stores and halted transport. Special passes were required for people wanting to leave their homes. Political feeling has run high in the city, capital of Andhra Pradesh state, since the state's chief minister, N.T. Rama Rao, was fired last month by the governor, an appointee of Prime Minister India Gandhi.

2 Killed in Spanish Terrorist Attacks

MADRID (Reuters) — Suspected leftist guerrillas shot to death two Spanish businessmen and badly wounded a radio engineer in separate attacks in three Spanish cities on Wednesday, police said.

One of the guomen later was killed in a battle with police, who said

they believe the attackers were members of the guerrilla group GRAPO (October First Anti-Fascist Revolutionary Groups), which has claimed responsibility for several killings since 1975. Police said the attacks may have been carried out to mark the third anniversary of the death of a GRAPO leader killed in a gun battle with security forces.

The director of a property company was killed in Madrid and the president of a local employer's union in Seville died in a gun attack. In La Coruna, an engineer with the Spanish National Radio was shot by attackers who identified themselves as GRAPO members.

French Approach Libyans on Chad

PARIS (Renters) — France has sent a special envoy to Libya to discuss getting both countries' troops out of the north-central African republic of Chad, French television said Wednesday.

Diplomats in Paris said Guy Georgy, a former French ambassador w Libya, conferred Wednesday with Major Abdel-Salam Jalloud, chief deputy to the Libyan leader, Colonel Moamer Qadhafi. The meeting came three days after after President François Mitterrand ended a series

of secret talks in Morocco with King Hassan II.

The diplomats said France considered that the recently declared union between Morocco and Libya offered a chance for a peaceful settlement in Chad. They said they believed that Colonel Qadhafi had dropped his insistence that Hissene Habre, the Chadian president, resign before any Libyan disengagement, and now was proposing an internal political

Mondale Vows to Seek, If Elected, Talks With **Soviet on Arms Freeze**

The Associated Press SALT LAKE CITY, Utah -Walter F. Mondale said Wednesday that if elected president he would call on Soviet leaders on his first day in office to hold a summit meeting within six months "to freeze the arms race."

Appearing before the American Legion convention one day after Ronald Reagan addressed the group, Mr. Mondale said that Mr. Reagan had flunked a "crucial test of presidential leadership" by mak-ing no serious effort to negotiate an arms agreement

He said. "I am announcing now that on my very first day as president I will call on the Soviet leadership to meet me within six months in Geneva for fully prepared, substantive negotiations to freeze the arms race and to begin cutting back the stockpiles of nuclear weapons."

■ Candidate 'Danmed Mad' Earlier, Bernard Weinraub of The New York Times reported from San

Jose, California:
Mr. Mondale, saying he was "damned mad" at Mr. Reagan's tax policies, has accused the administration of substantially increasing taxes for Americans earning less than \$10,000 and providing tax relief for the wealthy.
"I'm mad, I'm angry, I'm

dent of the United States." said Mr. Mondale, who has pro-posed an \$11-billion education

Reagan Appeals For Help to Gain **Veto on Spending**

CHICAGO — President Ronald Reagan urged Middle Western business and financial leaders Wednesday to "write letters, send wires, twist arms" to help him gain the power to strike individual spending items from the federal budget.

Mr. Reagan, following a to the Economic Chib of Chicago, said he plans an all-out fight for line-item veto authority if he is re-

elected in November. "It's absolutely necessary; it's the most vital tool," Mr. Reagan said, for controlling government spending. He said that as governor of California he used his power to cancel spending for individual bud-get items more than 900 times and

such a veto was never overridden by the state legislature. "They never once dared stand up and publicly vote for that single item that they had agreed to put into another bill," Mr. Reagan

program over four years. "In the area of education, on policy, he's uneducable."

Hours earlier in Compton, he said that perhaps the "biggest difference between President Reagan and myself" is their policies toward "people of average means." Mr. Mondale stood beside a chart and asserted that the 1981 tax bill that reduced income taxes over three years actually increased taxes for

the poor.
Mr. Mondale said that under the measure the taxes of Americans earning less than \$10,000 were rising by 22 percent over the three years while taxes were rising by 7 percent for those earning \$10,000

He also said that under the bill taxes "stayed even" for Americans earning \$20,000 to \$30,000.

"Now suppose you earned be-tween \$30,000 and \$50,000," said Mr. Mondale. "You got a 1-percent reduction in your taxes. If you made between \$50,000 and \$100,000 you got a 3-percent cut in your taxes, or \$1,500 in relief. "If you made between \$100,000

and \$200,000, you got \$8,900 in tax relief or an 8-percent reduction," he said. "If you made more than \$200,000 a year, you got \$60,000 in tax relief or 15-percent reduction." Mr. Mondale said, "I believe

that's dead wrong. And ask what kind of people we are. Do we believe in work? Yes. Do we believe in being fair to working people? Yes. Do we believe in giving families enough for a decent life? Yes."

At another chart, Mr. Mondale asserted that 90,000 corporations

"don't pay a penny in taxes."
"Let's look at some of the major industries in America," he added. He said the broadcasting industry earned \$784 million last year and paid 8.9 percent in taxes. This is "about half what you pay," Mr. Mondale told the workers.

He said the aerospace industry earned \$2.2 billion and had a minus tax rate of \$13 million. He said banks and financial institutions earned \$1.4 billion and had a nega-

tive tax rate of 3.8 percent.

"Insurance the same thing," said
Mr. Mondale. "They had a minus
tax rate of 6 percent. If you're in chemicals you had a minus tax rate

of 17 percent."
In his discussion with the workers, he repeated his own tax pro-

"First of all I would cap the tax cuts given to Americans earning over \$60,000 a year in the last tax cut bill," said Mr. Mondale. "Secondly, I would have a 10-percent surtax for people making over \$100,000 a year. Next I would have a 15-percent minimum tax on corporations so they would pay some-thing. And the next think I would do is deal with indexing but not touch Americans who are making \$30,000 a year or less. And I could have a better program for enforcing tax laws against people who are avoiding them."

Mr. Mondale said that the Reagan administration was considering a national sales tax that would place especially heavy burdens on the poor and middle class. "Under Mr. Reagan the rich can get richer

Environmental 'Hit List' Is Laid to White House

By Philip Shabecoff

New York Times Service WASHINGTON - The White House sent the Environmental Protection Agency in 1981 a list of career officials that a leading business organization wanted purged from the agency, according to a document made public by a House investigating subcommittee.

The document, consisting of notes written by the agency's chief of staff, John Daniel, described a telephone conversation with a presidential assistant, Craig Fuller. The Daniel notes said Mr. Fuller had reported that what the notes called "hit list" for the agency had been sent to the White House by the Chamber of Commerce of the United States.

agency's administrator, by E. Pendelton James, who was assistant to the president for personnel.

Mr. Daniel said in a telephone interview during the weekend that the list had been sent to the agency and that Mrs. Burford had declined to act on it. Mrs. Burford, in a phone conversation Tuesday, confirmed that she had received such a

According to the Daniel notes in meeting of White House officials, including the chief of staff, James A. Baker 3d, the counsel, Fred Fielding, and the White House spokesman, Larry Speakes, in addi-

tion to Mr. Fuller. The date of the meeting was given as March 3, 1982, when the environmental agency was in crisis because of the increasing pitch of congressional investigations into charges of mismanagement of toxic waste pro-

INTERNATIONAL

Where the world is at home™

And So On in South Africa

The startling fact about South Africa is not authorities called "police countermeasures."

As it happened, the roots took place on the that an occasional riot or police action brings white repression and black unrest into the news but that there is, relatively speaking, so little evident protest. The immense blanketlike white police apparatus, Soviet in quality, makes protest prohibitively costly for most people most of the time. Moreover, among the politically powerless black majority there is a wealth of patience and stoicism that is awesome, verging on incomprehensible, especially in light of the massive provocation and offense to which blacks are routinely subject.

It is significant, then, when racial violence takes place on a scale large enough to draw notice. It happens every few years, and it suggests the depth of the feelings — fear among whites, rage among blacks - that form the real social base in South Africa.

Such a flaring has just taken place in some of the segregated slums ("townships") in which blacks are forced to live around Johannesburg. The proximate causes were the usual last straws: increases in rents and things of that nature. Young people were active in the streets. Most violence was directed against the targets closest at hand — the black facilities (beer halls, municipal buildings) and officials regarded as surrogates for the whites' apartheid system. Children as young as 6 were among the more than 20 blacks killed in what day white South Africa inaugurated the new constitution by which it has meted out a sliver of political participation - but not real power - to its Asian and mixed-race minorities. Whites designed this "new dispensation" precisely to continue denying even a weak political voice to the black majority. Just as the low Asian and "colored" participation has constituted one judgment on the new political scheme, so the riots constitute another.

One of the townships in which conflict broke out during the weekend was Sharpeville. You will recall Sharpeville. In 1960, police there machine-gunned a crowd of demonstra-tors, killing 69. The massacre led to the forma-tion of the black revolutionary organization, the African National Congress, which remains the white minority's nemesis to this day. Its leadership was drawn from blacks such as Nelson Mandela — who is still recognized as a ranking ligure although he has been a political prisoner for 22 years — who had tried and ailed to achieve a legal political role.

Even as the embers smoldered in Sharpe-ville, the third bomb in two weeks exploded in a government building in Johannesburg. Who believes that this latest bombing, or the latest

- THE WASHINGTON POST.

East Germany Says Nyet

Who knows what Soviet threats and bribes finally made Erich Honecker cancel his trip to West Germany? Angling to become the first East German leader to visit Bonn, he absorbed incredible abuse all summer. His persistence must have made the Soviet leaders feel that their imperial writ was on the line. In a sense, that made it so: The big news is not that Mr. Honecker has buckled but that he was left free

so long to think he didn't have to. East Germany's party-led revolt bore no resemblance to the truly popular Polish one. But it, too, challenged Soviet domination and again demonstrated contradictory realities.

On the one hand, neither ideology nor fraternity seems able to harmonize the national interests of the Soviet Union and its allies in Eastern Europe. The smaller nations' economic and cultural interests in greater independence infect Communists as well as anti-Communists. The yearning of those countries is an enduring source of friction and instability.

On the other hand, no economic or propaganda advantage seems enough to deter the Soviet leaders from crushing every act of real political tributes and massive loans to East Germany were no match for Moscow's fear of

appearing to lose control.

Still smarting from their failure to keep
American missiles out of West Germany, the Russians found it intolerable for East Germany to forgive so soon. Although Eastern Europe clearly favors detente, the Kremlin will tolerate only one of its own design and timing. The East Germans hint that they will raise

their heads again at a better time, and the West Germans are properly leaving the door ajar. But those Germans. East and West, who dreamed of finding more room for maneuver between two dominating superpowers have now seen how different the superpowers really are. American leaders huffed and puffed against European collaboration on the Soviet oil pipeline, but they had the vision and strength to subordinate a perceived American interest to a German one. The same cannot be said for Moscow. When it huffs and puffs, its allies have to have fits of apoplexy.

Remember the 22 Poles

Poland's Communist regime is backtracking, slyly testing world opinion to see just how much it can get away with. The West's answer to General Jaruzelski should be clear: If you want to improve your reputation, it will have

to be by keeping promises, not dodging them.

The amnesty decreed earlier this summer promised that within 30 days all political prisoners would be liberated. The only exception treason, espionage or sabotage. But since no one had been formally indicted on such charges, it was reasonably expected that all 652 political prisoners would be released. Un-like a hedged 1983 amnesty that impressed no one, this sweeping measure won cautious praise from credible opposition Poles and an announcement from President Reagan of con-

ditional steps toward easing U.S. sanctions. Now more than a month has passed. Most of the political prisoners have indeed been freed. But 22 of those originally classified as eligible for release remain incarcerated, including Bogdan Lis and Protr Mierzejewski, two former leaders of the Solidarity underground. And some of the freed activists have since been redetained for political activities. For there to be meaningful progress on easing financial and trade ties, the Polish re-

gime will have to adhere to its own declared goals of genuine national reconciliation. Neither the Polish people nor the West is in respect fully the democratic norms and univer-

sal human rights that Poland has agreed to in a variety of international treaties. Nor can democrats and unionists do more than lament the regime's betrayal of the Gdansk agreements signed four years ago last week.

Everyone recognizes that the Solidarity period is now over and that fresh progress must be sought on the basis of the new realities of 1984. But even while deferring to such realism, the world need not condone or forget the treat-ment of those 22 remaining political prisoners.

- THE NEW YORK TIMES.

Other Opinion

From Marx to John Paul II

Just over 100 years ago Karl Mark declared religion to be "the opium of the people." It may seem strange, therefore, that his dogmas --- dependent as they are on materialism and atheism - should have taken such a grip on the thinking of a number of Roman Catholic that Pope John Paul II feels it necessary to issue a formal condemnation. [Monday's] document from the Vatican is a clear response to the growing influence of Marxism on the controversial "theology of liberation" which is

politicizing and often dividing the church. Whether this document will mute or further divide the church in the Third World it is impossible to predict, and both Washington and Moscow will be watching with anxiety.

1909: Why Redesign the Greenback?

NEW YORK - Proposed changes in the size

and color of American currency call forth

varying comments. Denver "Republican": "In

known to refuse an American bill on the

ground that it shocked his aesthetic sense.

Altogether it would seem that the Treasury

Department is rather overdoing the thing in

this effort to find something to do in a differ-

ent way." Philadelphia "Inquirer": "It is to be

hoped that the new currency will be somewhat

smaller in size and will contain less engrav-ing." Baltimore "American": "Secretary Mac-

Veugh believes a greenback by any other color

swells out bank accounts just the same." Pitts-

burg "Dispatch": "If this will keep us from

getting short change on the two-dollar denom-

ination, everyone will be for it."

What is clear, however, is that the pope is rightly determined to prevent Marxism from becoming the opium of the clergy.

- The Daily Telegraph (London).

Perspective in Nicaragua

Nicaragua has to be seen from the bottom up. The bottom is where for many years 90

percent of the population lived.

The changes that have been introduced into the lower layers of Nicaraguan society since the fall of dictator Anastasio Somoza in July 1979 are all-encompassing. Only from the bottom up can the relationship between the people and the post-revolutionary Sandinist goverament be understood.

-- Jacobo Timerman, writing in Newsweek.

FROM OUR SEPT. 6 PAGES, 75 AND 50 YEARS AGO 1934: Hoover Faults the New Deal LOS ANGELES - Former President Herbert Hoover, following up his article in the current "Saturday Evening Post," made his first public the matter of beauty nobody has even been appearance in several months [on Sept. 5] by delivering an address before the Service Clubs Council in which he attacked the New Deal without specifically mentioning it by name. He dwelt on the huge Federal spending program for relief by characterizing the Los Angeles Community Chest participants as a "great group intent to maintain the high virtue of charity these days, when so many think they can rid humanity of its faults via the discard.

and also of its hard-won virtues." The fact that the former Chief Executive should appear be-

fore the public eye is taken by some observers

as an indication that he is opening his cam-

paign for re-election in 1936.

An Isle in Distress, and No Savior in Sight

WASHINGTON — Ten years ago this summer the independent republic of Cyprus was twice brutalized by large neighbors. First the Greek military junta in

Athens instigated a coup that sought to kill the Cypriot president, Arch-bishop Makarios, and install a known terrorist in his place. Then, to thwart that attempt. Turkey occupied northern Cyprus, driving thousands of Greeks from their homes and their land and establishing control over a large section of the island on behalf of the Turkish minority.

The Greek military dictatorship collapsed as a result of its adventurism on Cyprus and was replaced by a democratic government. The demo-cratic Turkish government that or-dered the invasion was replaced by a military government several years later. Those changes have only reinforced the paranois of Greece and Turkey about each other, especially

regarding intentions on Cyprus.

A decade after the 1974 Cyprus crisis, a NATO member, Turkey, continues to occupy what was formerly an independent state, and the 600,000 Greek and Turkish Cyprists. 600,000 Greek and Turkish Cypriots continue to live in tension.

The Cypriots, it must be said, are both agents and victims of the inter-national indifference to their plight. There was so much antagonism between the two communities from the time of Cypriot independence in 1960 until 1974 that it has become difficult to rouse much international interest in a long-term settlement.
The Turkish sector comprises 36

percent of the island's territory and 20 percent of the population. It has a stagnant economy, with Turkey its only protector, benefactor and trading partner. The Greek Cypriots, ed into the southern part of the island, are prosperous, but they say that they can never accept either the

> The United States failed to act alone or with its allies to stabilize Cyprus and preserve its integrity and independence.

July 1974, but the State Department steadfastly insisted that it saw no

signs of foreign intervention. Without American support the Greek dictatorship could not have survived, since it was largely ostracized by the West European democracies. Many in Greece, and elsewhere, believe that the United States was actually behind the 1967 coup that overthrew Greek democracy and brought the colonels to power. This interpretation of events remains highly dubious, but the dictatorship

highly dubious, but the dictatorship that emerged could not have survived without U.S. arms and support.

Secretary of State Henry Kissinger opposed any U.S. role to prevent or respond to the first Turkish invasion of Cyprus in July 1974. Yet a decade earlier a similar Turkish threat to invade the island was stopped by a

arms embargo on Turkey to force its

withdrawal from Cyprus.
In the curious ways of Washington, the arms embargo rather than the invasion became the issue. The Turkish occupation was all but forgotten as two presidents sought to persuade Congress to repeal the embargo. Nei-ther administration showed an interest in Cyprus except as it affected the issue of the embargo, and, indirectly, U.S. relations with Turkey. The em-bargo ended in 1978. But the Turkish army is still on Cyprus.

The Carter-Mondale administra-

tion took credit for ending the embargo and then tried to induce a settlement. The plan failed after the administration tried to proceed without getting the needed support from West European countries. Turkey subsequently fell under military rule and is now under scrutiny for human

Unfortunately, the United States now displays the same tolerance for military rule in Turkey as it did for the Greek junta. In both cases it seems to be telling allies that military cooperation and U.S. base rights are more important than a restoration of

democracy or human rights.

American blindness to the fate of democracy among its eastern Medi-terranean allies has been a theme of five administrations, from Lyndon Johnson to Ronald Reagan. There is little likelihood that it will change with the Reagan-Mondale race this fall. Neither candidate has demonstrated great concern for human rights as a crucial element in international affairs. Both have records of tolerating a military-centered pol-icy in the area. And neither is likely to provoke Turkish trascibility by pressuring Ankara to end its 10-year-old occupation of Cyprus.

A renewed Cypriot nationalism, based on rejection of both Greek and Turkish interference in the island's fate, is one hope. President Makarios seemed, in his final years, to embrace true Cypriot independence from both Greece and Turkey. But before a new Cypriot nation can emerge, someone must extricate the Turkish military force without jeopardizing the securi-ty of the Turkish Cypriot minority.

With Europe diverted by more immediate problems and the United States indifferent, Cyprus has no-where to look. The United Nations and the Third World profess interest. but neither has the influence to move Turkey or the Cypriots to a solution.

The writer was staff director of the House Foreign Affairs Committee's subcommittee on Europe during the 1974 Cyprus crisis. He contributed this OTHE BREDE NOTION DESEFFECTION! NAME OF THE PRINTS!

Pressures For Change In Pretoria

By Colin Legum

LONDON — The elections for mixed-race and Indian members to sit in South Africa's new threechamber Parliament produced few surprises. It was never to be expected that many "coloreds" would be ready to vote for those of their leaders who have agreed to cooperate with the apartheid regime. It was predictable that 80 percent of the Indian community would boycott the elections. It was predictable that the elections would further polarize politics between blacks and whites, and within each of the four racial communities.

In reading the election results it is important to take account of the cru-cial differences in the voting between mixed-race communities living in the mixed-race communities living in the rural areas of Cape Province and Transvaal, and those who live in the Cape Town area, the cultural and political heartland of South Africa's 2,765,000 people of mixed race.

While between 20 and 30 percent of mixed-race voters went to the policy.

of mixed-race voters went to the polls in rural areas, scarcely 5 percent voted in Cape Town. One new member of Parliament won his seat with only 118 votes cast in his favor; he will now draw 24,000 rands (\$15,000) a year as the unrepresentative "repre-

sentative" of his constituency.

The government naturally blamed the low turnout on "intimidation" of voters by advocates of the boycott. It could be argued with equal force that the authorities themselves resorted to serious intimidation by arresting more than a score of prominent African, mixed-race and Indian leaders opposed to the elections. Intimidating, too, was the heavy-handed police action against placard-bearing dem-onstrators, especially in Lenasia, the Indian suburb of Johannesburg.

Anyone with electioneering experience in South Africa well knows that the pro-boycott "intimidation" wit-nessed at the recent mixed-race and Indian election meetings was no greater — and arguably less — than the intimidation often experienced is

white election campaigns.

The men who run the South African government are not fools. They may seek to mislead others, but seldom themselves. They know that the mixed-race and Indian politicians whose careers are being promoted under the new constitution carry little weight in their communities.

Major concessions will be neces-sary if the government's mixed-race and Indian partners are to stand any chance of improving their standing in their communities and of building up support for the new constitution. The government will have to put up with much hostile criticism from influential men like Allan Hendrickse, leader of the mixed-race Labor Party.

Collaborators will need to demonstrate that they are not stooges of the government. They can be expected to do so in strident fashion. There is no doubt that the governcontributions toward improving

ment will be ready to make greater mixed-race and Indian education standards, training for employment and housing — as it is already com-mitted to do. For the first time, the total expenditure on education in the 1983-84 budget was 2 percent higher than the ligure for defense, partly due to larger allocations for African and mixed-race education.

The new Indian and mixed-race members of Parliament can be relied on to wage a vigorous campaign to include Africans in the new multi-racial Parliament. Prime Minister P.W. Botha -- soon to become President Botha — is known to be person-ally in favor of extending his reforms to give the country's seven million urban Africans a voice in Parliament He will need the pressure of the Indian and mixed-race members of the President's Council to push this reform through the white chamber.

Although it remains true that the overnment's constitutional reforms do not represent genuine change in the sense of providing for an equita-ble sharing of power among whites and blacks, the new hybrid Pariament and an executive presidency do seem destined to change the face of South African politics.

Critics of the government, on both the left and the right, fear that the country is heading for a more dicta-torial direction under its executive president. At the same time, many who favor broader reforms believe that Mr. Botha needs the added power to push them through. Whether one takes a positive or a

negative view of the constitutional reforms, the conclusion is inescapable that South African politics are headed for an unpredictable future. International Herald Tribune.

N EW YORK — As the violence goes on in Central America, with no peace in sight, something remarkable is occurring in Colombia. More populous than all of Central America combined, Colombia suffers

from a multitude of social problems and has what may be the most violent history in Latin America, especially during the past 40 years. Several guerrilla armies have operated there for years. The guerrillas have never come close to seizing power, but the Colombian armed forces have been mable to wipe them out.

The armed forces are no closer than ever to a military victory — yet the war seems to be ending. How has this happened? Credit is due to President Belisario Betancur.

Elected two years ago, Mr. Betan-cur immediately established a peace commission to negotiate a settle and initiated a significant effort to improve the human rights situation.

That situation has been very bad. Colombia is a democracy, but some regions have been militarized for years; abuses in them are very much like those in El Salvador and Guatemala. Extensive death squad activity in the cities has been responsible for hundreds of killings and disappearances and considerable torture

Such abuses have not been stopped, but they have been limited. thanks especially to the efforts of President Betancur's attorney general, Carlos Jimenez Gómez, who indicted some 55 military personnel for death squad activity. The indictments led to nothing because Mr. Jimènez lost a battle to bring the cases to civilian courts. But the charges nevertheless placed the government firmly on record against such abuses and

demonstrated its willingness to point the linger against those responsible.
When the indictments took place the minister of defense, General Fernando Landazabal Reyes, ordered all members of the armed forces to allocate a day's pay for the defense of the accused. Several months later Mr. Betancur seized on another episode of public deliance by General Landa-zabal and dismissed him. It was an important event in asserting civilian control over the armed forces. Although President Betancur's hu-

man rights record is not perfect, the essential message he has conveyed is that his government stands for respect for law and for civilian control of the armed forces. Without this it

fense system would force the Soviet

Union to fall back on its bombers for

possible attack against the United States instead of relying on ICBMs. This would give the United States

advanced warning times in the event of intercontinental hostilities.

Two important considerations are

ignored. First, ballistic missiles

Adam Malik Dies at 67;

NEW YORK - Adam A. Maik, 67, the Indonesian diplomat who served as president of the in 1971, died Wednesday of cancer of the liver at his home in Bandung.

Mr. Malik was Indonesia's foreign minister from 1966 to 1977 and his country's vice president from 1978 until March of last year. An adroit politician, he was able to adapt to often rapidly changing tides in Indonesian affairs.

A militant nationalist, he was in the forefront of the struggle that led to independence from Dutch colonial rule after World War II. He veered toward socialism later, during the autocratic regime of President Sukarno, and shifted to a middle-of-the-road stance as he rose higher in Indonesian and in-ternational affairs.

He had a key role in forming the Association of Southeast Asian Nations in the late 1960s. Known as ASEAN, the alliance forged strong bonds between his own country and Thailand, Malaysia, the Philippines and Singapore. Mr. Malik was born on July 22,

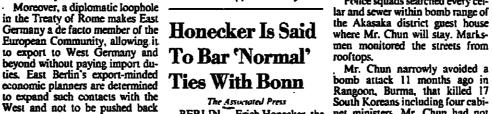

1917, into a Moslem family on the west coast of Sumatra, a major is-land in what were then the Dutch East Indies. His formal education never went beyond a Dutch primary school and a Moslem religious school.

Spanish Concerned By Military Aspects of Libyan-Moroccan Pact

By Edward Schumacher New York Times Service

MADRID — The announcement of a treaty of union between large, paid secret visits to Moroc-Morocco and Libya, including a co's ruler, King Hassan II. mutual defense accord, has raised Spanish concerns about the mili-Treaty Organization.

Western diplomats said privately that it was doing so to calm widespread public fears. Morocco is separated from Spain by the 10mile-wide (16-kilometer) strait and has laid claim to two Spanish-held enclaves, Ceuta and Melilla, on Morocco's Mediterranean coast.

Moroccan officials have said the pact, which was announced last month, was not directed against Spain. But leaders of the governing Socialist Party here, the armed forces, rightist political leaders and many of the nation's newspapers have seized on the pact as an argument in favor of Spain's staying in NATO to counterbalance the two North African countries.

Spain is not militarily integrated into NATO under its two-year-old membership and the country is divided over whether it should be- al of NATO membership in meetcome so or pull out altogether. The government, which appears to support the status quo, has promised to hold a referendum on the issue sometime next year.

"The announcement of the treaty of union between Morocco and

Added factors are the conflicts and jealousies dividing Libya and Morocco from three other African countries, Algeria, Tunisia and Mauritania, which have a competing alliance. Algeria has backed guerrillas fighting Moroccan troops in the former Spanish Saha-

Mr. González has been heavily criticized by the country's press and by rightist political leaders for his lackadaisical public posture over the new treaty.

But the government's real concern was evident in the moneuvering begun by leaders of its majority faction in the Socialist Party. Pointing to the North African threat, they are pushing for approvings of the party's executive councils this week before going into a party congress scheduled for May. Many Socialist hard-liners oppose NATO membership.

Morocco Jail Fast Is Reported Over

PARIS - About 35 Moroccan prisoners, mostly students arrested after riots in January, have given up a hunger strike started July 4, a human rights group said Wednes-

Two of the hunger strikers reportedly died last week. Approximately 15 others are in comas, according to the Association for the Defense of Human Rights in Morocco. The authorities in Morocco have not confirmed the deaths.

The association said at a press conference in Paris that the prisoners gave up their strike following an "oral promise" by the authorities to meet demands for family visits. The pact has startled the other books and permission to study and

SCIENCE

the night New Analyses Suggest Early Man's 'Campsite' Was Mere Stone Cache er pattern might have developed only gradually and reached its fa-By Erik Eckholm

NEW TESTS of bones and stones nearly two million years old have forced many scientists to ahandon a cornersione theory about the social behavior of man's ancient ancestors. As a result, the early history of human culture is being rewritten.

Recent analyses of fossils from Ilduvai Gorge in Tanzania, one of he world's best-known archaeoogical sites, suggest that the hunter-gatherer lifestyle might have developed later in human history than previously thought and that the social patterns associated with that way of life might be less cen-tral to "humanness" than is often asserted. Scientists are now developing new theories about how hu-

man ancestors actually lived. For more than two decades, aggregations of animal bones and described as the remains of campsites in which groups of humanlike creatures clustered together for safety and to share food.

Social interaction centered around such a "home base," a characteristic of the hunter-gatherer bands in which virtually all people lived in the millenia preceding the advent of agriculture, has been considered a key distinction between human ancestors, or hominids, and other animals.

Many anthropologists have theorized that the home bases of early hominids were the crucible in which the development of nuclear families, extended childhoods, language and other unique attributes of human culture was spurred.

But a re-examination of fossil

and tool concentrations deposited nearly two million years ago at Olduvai Gorge has persuaded many anthropologists that they do not represent home bases at all.

The new analysis thus calls into question the oft-repeated theory that humans lived the hunter-gatherer way of life - with its attendant family structure, division of labor between the sexes, and inter-family sharing of food and other tasks — for ⁹⁹ percent of mankind's history, from when hominids first began chipping stone into tools until the invention of agriculture about 12,550 years ago

Rather than being integral to the emergence of humans as distinct animals, and hence representing the "natural" condition of the species, the base-camp, hunter-gather-

miliar form in later stages of cultural development, the studies suggest.

The re-evaluation of fossils at Olduvai Gorge, a ravine made fam-ous in 1959 by Louis and Mary Leakey's electrifying discovery of what were then the earliest known hominid bones, also carries lessons

for paleo-anthropologists.
"We simply do not know as much as we envisioned when it seemed appropriate to extrapolate a human hunter-gatherer model back two million years," said Rich-ard Potts of Yale University, a pioneer in the re-examination of early hominid sites.

Until the late 1970s, scientists tended to read back from the present, searching for similarities between the lifestyles of ancient hominids and modern remnants of hunter-gatherers in Southern Afristone tools found buried beneath the soils of East Africa have been many have consciously tried to look anew at the archaeological evidence of hominid behavior.

"Most anthropologists are now starting with the assumption that the past will be unlike the present." said David Pilbeam of Harvard University, who has championed the shift in perspective. "The new approach makes us step back and ask what kind of animals these were, rather than what these ancestors of ours can tell us about our-

Glynn Isaac of Harvard University said in a recent paper that "our studies are teaching us humility." Mr. Isaac, who has studied similar assemblages at Koobi Fora in Ke-nya and in the 1970s argued that food-sharing in home bases was the driving force of human evolution. now concludes that previous hy-potheses, including his own, "made the early hominids seem too hu-

With doubt cast on what had seemed a powerful description of early hominid society, scientists are searching for new ways to explain crude stone tools and eating meat. The evidence also shows that at concentrations. Positing that hominid behavior may have been unlike ahly *Homo habilis*, which is thought any known patterns, they are try- to be a direct ancestor of Homo ing, solely on the basis of scanty sapiens, carried both stones and archaeological evidence, to reconstruct life at the very dawn of human existence.

The fossil record does prove that about two million years ago homi-nids were already behaving differently from other apelike animals.

But the answers to other crucial nient butchering sites as they forquestions --- whether family groups foraged and slept alone or together, whether food was shared among families, whether males maintained lasting ties with their mates and offspring, whether most meat was sapiens, carried both stones and hunted or scavenged and how im-portions of animal carcasses to the portant it was in the diet — are far habitation. less clear today than they seemed a transport of tools and food was a few years ago.

Mr. Potts suggests that rather than occupied camps, the Olduvai assemblages could be the remains They had long had the ability to also lived in East Africa in the stand erect, believed to be the first period under study.)

of "stone caches" where horninids stored stone tools to provide convestored stone tools to provide conve-

aged for meat. He argues in the current issue of American Scientist that fierce animals such as hyenas and sabertooth cats, always on the lookout for meat and bones rich in marrow, would have rendered the sites too dangerous for hominid

Computer simulations indicate that the setting up of numerous long-term sites throughout the for-aging zone, with stone implements in place to enable quick visits for would have saved the hominids time and energy.

IN BRIEF

A New Approach to Infant Jaundice

BOSTON (AP) - An enzyme derived from fungus may provide a safe and effective new approach to treating severe jaundice in babies, a recent study at the Massachusetts Institute of Technology concludes.

Jaundice is common in infants, and usually goes away without treat.

ment. But sometimes persistent cases must be treated by replacing therechild's blood, and researchers believe their new approach—still in the

child's blood, and researchers believe their new approach — still in the experimental stages — may someday give doctors a less hazardous alternative to that therapy.

The new therapy would involve passing the baby's blood through a filter that contains a fungal enzyme called bilirubin oxidase. The enzyme would break down the bilirubin into other, less toxic, substances. Then the blood and the converted bilirubin would be returned to the body.

System Developed to Cut Acid Rain

NEW YORK (NYT) — A system that uses microorganisms to break
down and remove organic sulfur residues from petroleum has been developed to help eliminate acid rain.

Petroleum has many ingredients, including sulfur-containing com-pounds. These are not useful in the fuel and are burned off as pollutants. into the atmosphere, where they become a major factor in acid rain. Removing organic sulfur pollutants from fossil fuels has proved difficult

Removing organic sulfur pollutants from fossil fuels has proved difficult because they do not dissolve in water.

In the new system, designed by Dr. William Finnerty at the University of Georgia and Dr. Frank Hartdegen, a researcher in Columbia, Maryland, petroleum and water are passed on either side of a membrane; holding entrapped microorganisms. As the petroleum passes, the microorganisms oxidize the sulfur compounds, breaking them down.

Flu Epidemics Tied to Solar Radiation

LONDON (AP) - A new study suggests that flu epidemics are linked

to global movements in solar radiation.

The study by Dr. Robert Hope-Simpson of Britain's Epidemiological Research Unit, published in the Journal of Hygiene, researches all major. flu outbreaks between 1964 and 1975. Dr. Hope-Simpson said current medical opinion that the flu virus survives by endless chains of direct transmission from individual sufferers fails to explain why epidemics should be seasonal.

He identified a pattern with outbreaks occurring around Earth's surface in a curve roughly six months behind the "midsummer" curve of vertical solar radiation. He said such phenomena occur because the seasonal variation in solar radiation along each line of latitude activates the latent flu virus existing in those areas.

WALL STREET WATCH

Analysts Keep Coming Back To Predict Unpredictable

By EDWARD ROHRBACH

International Herald Tribune ARIS - Is there life after Wall Street? Anything might seem pale by comparison with the stock market. Where else are conditions so changeable, so unpredictable, so exasperating? About all that is sure is that anyone who has been right for any length of time is about to be wrong. Of course, it is the converse of that which gives investors and

Donald D. Hahn, of Hahn Holland & Grassman in Chicago, was consistently bullish on stocks for nine months until the market finally exploded in early August. "I never thought it should have gone down in the first place," he explained.

"It was the consensus,

so you knew

What occurred, he said, was a "major change in psychology" with Wall Street suddenly deciding it would "no longer ignore the good news that the economy is strong, we are not going to have a recession next year, inflation is low and prof-its are rising instead of fall-

it wasn't going to happen." Even with the sharp August

rally he thinks that stocks remain at "bargain levels" and that the so-called second leg of the bull market that began two years ago has indeed commenced.

"This is just a lull now," he said. "We'll have a good shot at 1,300 before the year is out."

Mr. Hahn does not prechide the possibility of a correction down to the 1.150-1.200 range within the next few months, because "short-term interest rates remain high, the economic fraternity is still paranoid and political uncertainties abound." But, he asserted, the market's major trend is up: "Equity prices are in the reasonably early stages of a long-term advance that may propel the Dow-Jones Industrials to 2,000 within three to

The stocks that his money-management firm is buying are airlines with AMR and Piedmont topping the list, Crown Cork & Seal, General Electric, IBM and Coca-Cola.

Leon G. Cooperman, chairman of the investment policy committee at Goldman Sachs, paid the price for being right all through 1984 — before August snuck up on him. As he himself had quoted Lord Keynes in the firm's Investment Strategy publication July 26, just as Wall Street was bottoming: "It is better to be vaguely correct than precisely wrong."

r. Cooperman, who always had allowed for the possibility of short-lived rallies in a continuing downtrend, simply felt that the stock market was overvalued because high interest rates made competition from cash and bonds too stiff.

"I still think stocks are richly appraised vis-à-vis the bond market," he asserted, noting that Goldman Sachs does not have a

"positive outlook" for bonds either.
"The stock market is marching to the beat of the bond market,"
he added. "And if we're right, the bond market rally has run its course.' He thinks that at best Wall Street can enjoy a "trading range"

with stocks dipping to 1,100-1,125 on the downside and "their January highs as a top," when the Dow flirted with 1,300.

"I'd only be a buyer on weakness." he said. "Any near-strength I'd view with concern because it would only mean the market is getting itself further extended."

However, William M. LeFevre of Purcell Graham takes the view that "what the market has been saying lately is that interest rates have stopped going up and may soon start down."

Should there be a cut in either the discount rate the fee the Federal Reserve charges on loans to member commercial banks, (Continued on Page 11, Col. 4)

Revision Urged of U.S. Rules

GATT Seeks End To Textile Curbs

By Brij Khindaria
International Herald Tribune

GENEVA - The United States has been asked informally to withdraw, or at least postpone, plans to enforce new customs regulations designed to curb imports of tex-

The Textile Committee of the General Agreement on Tariffs and Trade said in a concluding state-ment that it had "noted a common view" in the committee in favor of withdrawal or postponement of the new rules of origin.

The rules take effect on Friday, although about \$500 million of imports have been exempted until Oct. 31. The regulations are simed at preventing evasion of U.S. quo-tas by such techniques as assem-bling clothing in a country other than the nation of origin.

Diplomatic sources said all 50 committee members except the United States had favored such a postponement. But the committee, which discussed Third World and European complaints against the new rules, did not make a formal call for withdrawal or postpone-

A postponement would allow time to hold urgent consultations to find the "appropriate solutions consistent with the provisions of the GATT and the Multi-Fibers Arrangement, and to any problems that may have given rise to the new U.S. regulations," the statement said.

Participants also agreed that the U.S. aim of preventing evasion of import quotas should be met through existing provisions of GATT and trade agreements between the United States and individual countries, the statement

The committee considered both the new rules of origin and investi-gations begun in the United States last July. Those investigations were conducted in response to calls by U.S. manufacturers for counter-vailing duties against 13 Thirdcountries that had been accused of subsidizing exports.

The committee noted "with deep concern that these developments would disrupt international trade in textiles and clothing."

The U.S. chief delegate, Peter Murohy, said at a press conference before the GATT panel called for a postponement that the regulation was under review in Washington. The U.S. review panel is chaired by President Ronald Reagan's trade envoy William E. Brock.

Screen Race Is Underway

By Gordon Graff

A cathode-ray tube, left, and a flat-panel LCD display.

New York Times Service
NEW YORK — Liquid-crystal displays those small black-on-gray readouts on digital watches and calculators — are turning up in unex-pected places these days. They are in miniature color televisions, auto dashboard panels and video games. And now, new technological breakthroughs are giving LCDs a good chance at their biggest market yet: screens for personal computers.

In fact, some computer-industry experts say the

future of portable computers may well be tied to the future of liquid-crystal displays. Cathode-ray tubes, the mainstays of televisions and personal computers, are too bulky for the new generation of

knee-top models.
Liquid-crystal displays, which use chemicals to produce an image, are thin and lightweight. If manufacturers can also make them easy to read and some say they already have done so — then LCDs could capture the market for portable com-puters and give cathode-ray tubes a run for their money in the larger, desktop computers as well.

Once LCD technology is perfected, "the markets will explode," said Gunther Rudenberg, a computer specialist with Arthur D. Little, a consulting firm. Worldwide LCD sales, he said, could rise from less than \$40 million last year to more

than \$3 billion by 1992.

The race for the new market is already spanning the Pacific. In the 1970s, Japanese companies vir-

tually captured the calculator and watch market

tually captured the calculator and watch market with their low costs and shrewd pricing.

This time, U.S. players — a new generation of small companies — are trying not to be outflanked. Those that are chasing the potentially lucrative computer market are concentrating their efforts on competing with the Japanese for sales of so-called large-area, flat-panel displays — high-priced, high-resolution screens — ideally suited for desktop computers. They are leaving to the Japanese other promising markets, particularly television sets, and they are leaving to such huge U.S. companies as General Electric Co., American companies as General Electric Co., American Telephone & Telegraph Co. and Hewlett-Packard Co. the highly specialized military and scientific applications for LCDs.

Indeed, the battle over computer screens is between American Davids and Japanese Goliaths. On the Japanese side are such behemoths as Ep-son, Sharp, Hitachi, Toshiba and Sanyo. Pitted against them are a group of small but technologically sophisticated companies in the United States, bearing names like Crystalvision, Panelvision and

The sheer size of the Japanese contenders gives them economies of scale. "Part of the advantage of being a big company is that we have our mass production down pat," said Robert Garbutt. general manager of the electronics components group at Sharp Electronic Corp., the Paramus, New Jer-

Dollar Continues Advance on Rate Rise Expectation

LONDON - The dollar contin-

ned its record-breaking advance Wednesday on foreign exchange markets in Europe, amid expecta-tions of higher U.S. interest rates. Gold prices fell.

The dollar surged to record levels against the French, British and Italian currencies, an III-year high against the West German mark and a 10-year high against the

Dutch guilder. Trading was described as lively. Dealers said traders feel U.S. interest rates are headed higher, a development that would lift yields on dollar-denominated invest-

The West German Bundesbank sold about \$200 million to curb the dollar's rise, dealers said, but banking sources said there were no signs of concerted central bank interven-

The dollar began the trading day by rising in Tokyo to 243.90 Japa-nese yen from 242.80 yen late Tues-

in London, the British pound sank to an all-time low for the third day in a row. Late in the session, sterling was quoted at \$1.2825, down from Tuesday's late rate of

\$1,2927, the previous low. Other late dollar rates in Europe compared with late rates Tuesday included: 2.9475 West German marks. up from 2.9245; 2.46375 Swiss francs, up from 2.4405; 9.0355 French francs, up from 8.9500; 3.3275 Dutch guilders, up from 3.3000; 1.816.00 Italian lire, up from 1,808.40; and 1,3043 Ca-

nadian dollars, up from 1.2960.

The value of gold bullion slipped in thin trading. In Europe, gold fell to \$338.50 an ounce in Zurich from

\$341.50 late Tuesday and dropped to \$337.60 an ounce in London from \$340.50.

[In New York, at the opening the dollar continued to gain on a relief that a strong U.S. economy wall push rates higher, Reuters reported from New York.

[However, volume was only moderate and dealers said operators were beginning to stand on the side waiting to see if the dollar would be able to break through the next technical resistance point 2.9520 marks.]

West Germany Reports Surge

BONN - The West German economy began the second half with surges in output and co-ders, the government said Wednesday. The reports ap-peared to show that the economy had recovered from secondquarter industrial disputes.

The Economics Ministry released preliminary, seasonally adjusted figures showing that industrial production rose 13.6 percent in July compared with June, and that new manufactur-ing orders rose 10.8 percent In June they had slumped by 9.6 percent and 8.8 percent

compared with May, because of strikes in the engineering maus-try. The dispute, along with walkouts by print workers caused economic output to decline by almost 1.5 percent in the second quarter compared

At 3 P.M.: NYSE Volume Low United Press International

NEW YORK — Prices on the New York Stock Exchange were broadly lower tate Wednesday afternoon in sluggish trading amid investor concerns about high interest rates. The Dow Jones industrial average, off 6 in the early going after skidding 12.03 Tuesday, was down 3.76 to 1.208.58 an hour before the close. Several analysts said the Dow, which climbed 109.10 points in August, would test the 1,200 or 1.00 least soon.

Declining stocks led advancing ones by a ratio of 9 to 5. Volume was about 58.1 million

While prices in tables on these pages are from the 4 P.M. close in New York, for reasons of time this earlier in the day.

shares compared with 52.1 million in the corre-

shares compared with 52.1 million in the corresponding period Tuesday.

Prices were lower in moderate trading of American Stock Exchange issues.

Analysts said this session was almost a replay of Tuesday's session in which prices skidded in slow trading. But there was some buying in utilities stocks, analysts said.

Peter Funiss of Shearson Lehman/American Express said he thinks "institutional decision-makers came back from vacation and are trying to plot what they're soing to do before the end

to plot what they're going to do before the end

of the quarter."

"Right now, the market is directionless," Mr.
Furniss said. "Interest rates have not come
down and that is the big drawback. Also, investors are watching bonds right now more than

they are equities. So, nothing much is happen

ng.

Bond prices were flat to slightly lower. The
dollar was higher again on international exchanges but precious metals prices, which skidded Tuesday, were mixed.

Investors were dismayed that yields on threeand six-month Treasury bills rose to their highest level in two years at the weekly auction Tuesday. It was the sixth time in eight weeks the

rates have risen.

Experts said recent figures indicate the economy is slowing but it is not going to run out of steam soon, as shown by a 0.7-percent rise in July construction spending. Many wondered if the slowdown was enough to drive down inter-

most of the day. Libya, which reportedly lowered prices recently, said it though oil charges would level off soon, according to the

latest dispatches.
Public Service Electric & Gas was active with a block of 267,500 shares traded at 23½. Commonwealth Edison made the list with a block trade of 304,000 shares at 25½.

Gulfsteam Aerospace was lower after a block of 321,600 shares crossed at 17½.

Carnation Co., which climbed 4 on Tuesday, was active. Nestle SA, which has agreed to buy Carnation for \$3 billion, said has begun its \$83-

a-share tender offer.

AT&T and IBM were active. Japan has picked AT&T as a partner in a five-year program to help the Japanese develop their own computer software. The move is seen as a blow

Exceptional vision. Sometimes a name alone defines it.

We see the future and act with purpose. Confidently. And with commitment.

We build engines with the best fuel efficiency. Lowest maintenance costs. Unmatched reliability. And we are the only manufacturer with three all-new third-generation turbofans.

Clearly, exceptional vision helps produce lowest cost of ownership for airlines.

Diversify into gold and minimize your risks.
Now! Financial councellors advise investing 10 - 15% of your assets in gold. Why? Because gold offers the closest thing to real security in an uncertain world.

Krugerrands - the world's most trusted gold bullion coins. Available at banks and bullion coin dealers in most countries around the globe.

Head of Research and Systems

New Appointment SOUTHEAST

c.£32,000, car, benefits

for a prestigious IT services organisation, providing a range of specialist services to a number of major City based institutions via large scale IBM based real-time facilities.

The appointee will plan and direct technical research and developments in response to users needs and demands to maintain significant competitive advantage, and manage and control systems development and implementation, user support and consultancy services. Staff resource responsibility via four managers is around 150.

Demonstrable experience in managing the systems engineering, development and implementation functions in a major IBM installation utilising high technology based data capture facilities is essential. The ability to exploit the use of technology to the full in maintaining a competitive edge in image processing, in the widest sense, in a fast moving consumer data retrieval and processing environment is considered vital.

Age indicator is around forty. A degree or equivalent professional qualification is desirable.

In the first instance please forward a comprehensive CV, or telephone or write for an application form to ANTHONY SPURR, Manager, Executive Selection Division, quoting reference number G1236. Applications are invited from either sex.

BIS Applied Systems Limited York House, 199 Westminster Bridge Road London SE1 7UT Telephone 01-633 0866

IBM PC to Run **Machine Tools**

New York Times Service CHICAGO - Cincinnati Milacron Inc., one of the largest

machine-tool makers in the United States, says it will market the first machine-tool control system that uses the IBM Personal Computer. The system is expected to make it easier to program machine 100is to cut, drill or shape metal.

The new system, to be introduced Wednesday at the International Machine Tool Show here, was developed by International Business Machines Corp. and Cincinnati Milacron. A programmer presumably

can simply tell an IBM Personal Computer what the shape and size of the metal is to be. Then the computer will calculate what motions the machine should make to achieve the result, and it will tell both the machine-tool operator and the machine what steps are to take.

ICL Says Fujitsu to Continue **Accords After STC Merger**

LONDON — Fujitsu of Japan will continue its joint agreements with ICL, the British computer maker, after ICL's merger with Standard Telephones & Cables. ICL said Wednesday.

Fujitsu had the right to terminate the agreements, relating chiefly to technology and components for ICL's future mainframe computers, if ICL were taken over.

STC's agreed upon bid for ICL, which values the company at £425 million (\$552 million), consists of one STC ordinary share for every three ICL ordinary shares, with a 90 pence per share limited-cash alternative. The statement said STC has now asked ITT Corp. to reduce its shareholding in the merged STC-ICL group to under 25 percent by the end of March next year.

iTT could impose legal and com-mercial constraints on both the completion of the merger and the long-term growth of the enlarged group.

ITT has agreed to reduce its holding in the merged group to 24 percent over the next seven months, subject to the STC offer becoming unconditional, ITT, which held up to 35 percent of ICL, had earlier said it would maintain

its holding at 29.9 percent.

The British Trade and Industry Department announced, meanwhile, that the proposed merger will not be referred to the British Monopolies Commission.

The general relations agreement between ITT and STC will not be terminated with the reduction in ITT's stake, the ICL statement This request follows recent talks said. STC will propose an amendbetween STC and ICL over the ment to its articles of association future development of the two after the offer becomes uncondi-businesses. STC decided that a tional to preserve ITTs existing stake of over 25 percent held by rights under the agreement

COMPANY NOTES

Aimomoto Co. has announced that it will expand sales of aminoacid sweeteners using aspartame in late September, in anticipation of an increase in demand for low-calorie sweeteners in Japan. A spokesman said the company aims for first-year sales of 300 million yen (\$1,24 million) for three new types of sweeteners.

Apollo Enterprises Ltd. has agreed to sell 16.1 million shares, or 44 percent, of its Taiwan-based subsidiary, Apollo Hotel Development Ltd., for 160.96 million Taiwan dollars (\$4.1 million), the Singapore-based company said.

> Nomura Securities Co. said it expects to report a current profit of 133 billion yen (\$55 million) for the year ending in September, com-pared with 121.54 billion year a year earlier. The dividend, announced with the company results, expected in mid-November, will rise to 7.5

Pergamon Press Ltd., the private company owned by Robert Maxwell, said it has increased its stake in Fleet Holdings PLC to 13.12 million ordinary shares, or 15.54

GENERAL MANAGER

Use your management skills for ecumenical development projects worldwide

In 1975, the World Council of Churches in Switzerland and the Council of Churches in the Netherlands, together established EDCS to use the investment capital of churches and church-related organisations for development projects in poor communities throughout the

With the retirement in July 1985 of EDCS's first General Manager, a successor is now being sought. He or she will be responsible to the Board of Directors for advising on policy formulation and for planning, organising, coordinating and controlling EDCS's operations and resources from its headquarters at Amersfoort, the Netherlands.

To qualify for this challenging position, first and foremost you must be a committed Christian (Roman Catholic, Protestant or Orthodox), be closely connected with your church, and support the purposes of EDCS. You must have a broad knowledge of the ecumenical movement worldwide, have had international experience.

and be prepared to travel.

Probably with at least a first degree in economics, business administration and/or banking, you must be a skilled administrator, experienced at Board level, with a successful record in risk management. You must have first-hand experience of project formulation and evaluation, and knowledge of trade, development or investment banking. Good communication skills and fluency in English are essential; a working knowledge of French and/or Spanish would be advantageous.

The salary and benefits package will be negotiated around DfI 140,000 and full relocation assistance provided.

Further information will be provided upon request. The closing date for applications is 15 October 1984. Please send full cv, with references, to the Chairman. Ecumenical Development Co-operative Society (EDCS) UA, Utrechtseweg 91, 3818 EB Amersfoort,

Netherlands. Telephone: Amersfoort 633122.

Race Under Way to Make Better Liquid-Crystal Displays

(Continued from Page 7) sey, arm of Japan's \$4-billion

Sharp Corp.
The U.S. companies "have a long way to go in terms of automating their manufacturing" and getting their costs down, said one West Coast analyst. Still, most analysts and many venture capitalists say that their technological acumen offsets their small size.

Ironically, Crystalvision, a five-year-old company that will gross less than \$1 million this year, already has developed liquid-crystal technology-that can display Japanese characters — something not even the Japanese have done yet. uvision is ic vale, California.

According to Howard Morgan, president of Renaissance Technologies, a venture-capital firm that is backing Crystalvision, the company is in general a year or so ahead of the Japanese. Which in this industry is a big lead time."

Alan V. King, Crystalvision's ex-

ecutive vice president and chief operating officer, talks of sales of more than \$100 million by 1988. Similarly, Panelvison, a Pittsburgh company founded four years ago by a group of former Westinghouse researchers, says it already is selling LCDs for portable computers, and it will soon introduce a larger, high-clarity screen.
Panelvision's sales are unlikely

to too \$100,000 in 1984, but Thomas C. Maloney, the company's marketing vice president, says that ini-

ALICE AT 80: A Novel

By David R. Slavitt. 257 pp. \$14.95. Doubleday, 245 Park Avenue New York, N.Y. 10167.

Reviewed by Joseph McLellan

THE year is 1932; Alice Liddell Har-1 greaves, on the brink of her 80th birthday, has been invited to Columbia University to receive an honorary doctorate. She knows that she is a substitute, that the university would rather be giving the degree to Lewis Carroll, a figure of great academic respectability whom she served as a pubescent muse in the production of two masterpieces, "Alice's Adventures in Wonderland" and "Through the Looking

Members of her family, including her par-ents, husband and son (the latter bearing the curious first name of Caryl, not at all by accident) harbor deep resentments of Lewis Carroll. But for Alice, he is still "that terrified. adorable, fussy, wonderful man, the man whom she has loved longest and best." He left his mark on Alice and her family, not only in his writings but in the intense, odd relationship that was abruptly terminated by her father for reasons that have never been completely clear.

Exactly what happened? Why did Henry Liddell, the withdrawn, scholarly dean of Christ Church, Oxford, interrupt his life's work (a Greek lexicon that is still the standard reference in its field) to drive the bounder from his doorstep? David Slavitt's latest novel is an exploration of this question, scrupulously observant of the known facts in the case, which ventures into a few speculations but never wanders beyond probability.

Lewis Carroll (or Charles Lutwidge Dodgson, behind his pseudonym) receives some viv id and apparently contradictory descriptions all of which seem valid in one way or another. To the president of Columbia, he is the creator of "imaginary figures and happenings in a language all his own. Making odd phrases and facts live on pages which will adorn the literature of the English tongue time without end." Alice's husband sometimes thinks of himself as "Dodgson's victim, or victim at second hand, a man suffering from Alice's suffering." He thinks of Dodgson as "that famous paedophile"; as "that bad man," and the "Alice in Wonderland" manuscript as "that dirty little icke of a national treasur

The "dirty joke" dimensions of the Alice books have been rather thoroughly explored

since the development of Freud's theories, to the point that it is hard for an alert adult reader to recapture the innocence and wonder with which they might have been read by a Victorian an child or written by a highly intelligent and even more highly inhibited cleric of the Church of England more than a century ago. It is easy now for armchair psychoanalysts to probe-Dodgson's poor, brilliant soul, to see the fins-trations behind his mathematical and logical paradoxes, the sexual overtones in his nonsense verse, the symbols lurking everywhere in his narrative. Besides, there are the photos taken by Dodgson — pictures of Alice and other nymphets, nude or exotically costumed that are works of art but also monuments of discreet prurience.

Clearly. Lewis Carroll was an odd bird and a one with a special weakness for little girls. The pathetic modalities through which he found his limited fulfillment are easy enough to guess, in broad outline if not in fine detail. Slavitt supplies a bit of that detail; it is his privilege BS a novelist, and he does it with style

But what happened? What did Carroll do to these girls when he was not taking their pictures or telling them stories? Slavitt's hypothesis is that he held them occasionally on his lan and stroked them gently, leaving them physically them physically in the physical stroked them gently. cally if not emotionally as virginal as ever. For girls with a simple, realistic outlook, it could be a valuable step toward maturity. For Alice, it was more complicated and perhaps it explains why (in Slavitt's fiction) she was not able to develop a completely satisfactory relationship with her husband. It all seems likely enough particularly when her memories are embodied

in Slavitt's sinuously persuasive prose:
"He did, yes, fondle them. He did kiss them He did stroke their hair. He ran the balls of his He did stroke their hair. He ran the balls of his fingertips down the middle of their backs, feathery-light, or touching the protuberant vertebrae of their spines, imagining strange beasts that lurked just beneath their skins (and, of course, the beasts were there, purring in delight). It was a sensual adoring, a thing any fleshly creature enjoys, kitten or puppy or child, a kind of preening, a lovely kind of love. that was so sharp — so heightened in its:
delicate balance between yearning and graincation — as to produce in the girls almost the
same sweet trembling as it produced in him. There is a curious kind of poetry in this

BRIDGE

By Alan Truscott

ON the diagramed deal, when South picked up his cards, he no doubt looked around suspiciously to see if somebody was playing jokes, but there was no comedian lurking in the wings, and all

the other players seemed nor-mally tranquil.

South thought quickly about two questions. Was there any scientific way of determining whether his partner held the spade ace? And if he hid scien-tifically to six or seven diamonds, would the opponents nerability was likely to dis-

courage the opponents from sacrificing.

Rather to South's surprise, his partner opened the bidding with two clubs. Since they were using a strong-club method, North simply indicated open-ing values with club length. East was surprised to hear about the club length, and chose to pass rather than over-call in spades call in spades.
South could now have taken

a stab at six diamonds, but, contented himself with two di-amonds in the hope of locating the spade ace. His bid did not show diamonds, but was sim-ply a relay asking his partner for more information.

Closing Prices in local currencies

Other Markets

West's bid of two hearts was certainly indiscreet at unfavorable vulnerability, and North should have doubled. However, he rebid his clubs and East bid a modest three hearts — the ten. Then South would be ten. Then South would be ten. perhaps he was accustomed to, have had to win and lead a rash overcalls from the other spade honor, succeeding be-

side of the table. South now lost patience, understandably, and leaped to six diamonds. East cautiously did not double, perhaps because he feared provoking a six-heart retreat by his partner. Alternatively the partnership may have been using the style in which a double in such a situation shows one defensive trick and leaves the final decision to

In spite of the fact that the defense held three aces, there was only one lead to beat the slam. West did not find it: Although there was strong indication that South was void in bearts, he led his ace and it was all over. South ruffed, crossed to dummy's invaluable eight of diamonds, and discarded a

spade on the heart king. The spade ace was the only trick for the defense, and East. was not pleased. However, a club lead would have had the same result, because a club winner would have been established in dummy.

A spade to the ace would have made matters easy for the declarer, but East could have cause East cannot lead a trump.

The winning lead would have been a trump, the on suit in which the defense die not own the ace. Even the the defense would have 2050 hurdle to overcome. After spade lead from dummy at posecond trick, East would lead to play the nine or the leading prevent an inspired finesse of

6-0, 6-3, after struggling through the first set. Third-seeded Wilander stopped Tim Mayotte, 6-4, 6-4, 7-6. Lloyd, Evert's husband, upset No. 9 Henrik Sundstrom, 4-6, 6-4, 6-4, Bassett will face Evert in the semifinals; Turnbull will meet the since Mark Cox in 1966 — and Mayer shocked 13th-seeded Tomas Smid, 6-3, 6-2, 6-3.

Earlier on the rain-interrupted Bassett, 16, is playing her first day, top-seeded John McEnroe had tournament since Wimbledon begained the quarters by ousting day, top-seeded John McEnroe had qualifier Robert Green, 6-3, 6-2, 6-Huber, 6-4, 7-5. Because of the still been on his mind?"

Wednesday published reports that he had jumped teams and

signed a \$1-million contract for

"I haven't signed anything." LeMond said in a telephone in-terview from his home in Kort-

rijk, Belgium. "We've done a lot

of talking but it's not certain yet that I'll be leaving Renault." His

contract for that team runs

American, has raced for Renault

since he turned professional in

1981. Regarded as a coming su-

perstar of professional bicycling,

LeMond finished third this year

in his debut in the Tour de France, the world's major bicy-

cling race. The tour was won by Laurent Fignon of Renault, with

Bernard Hinault of La Vie Claire

(formerly of Renault) second. La Vie Claire is the team that

announced Tuesday that Le-

Mond had signed with it for 1985,

abrogating his contract with Re-

nault. Bernard Tapie, the French

businessman who sponsors the

team, said, according to a United Press International dispatch from Paris, it was "up to him to free

himself of his other commit-

jump teams but rarely with repu-

tations or salaries like LeMond's.

He confirmed that Tapie had

offered \$1 million over three

years, a huge figure in a sport where many professionals make no more than the equivalent of

\$15,000 a year. LeMond's salary

with Renault is believed to be about \$200,000 a year plus such

various bonuses as the rent on his home in Belgium, assorted com-

pany cars and eight round-trip

airline tickets to the United

States for LeMond and his wife

Kathy, also an American.

The 23-year-old LeMond, an

teriums, which are one-day exhi-

bition races. He rides in 30 or 40 a

year and said, for example, that

he was leaving Thursday for two

weeks of criteriums in Italy and Norway. His total annual earn-

ings, estimated to be nearly

\$500,000, include endorsement

with Renault, he said.

fees — the center of his troubles

abuse my name," LeMond com-

plained. "There are five compa-nies I've got lawsuits going

against because they say I've en-

dorsed their products - brakes,

saddles, all the components. Re-

nault promised they'd help me fight this, but they haven't done a

thing." He added that his father,

who serves as his occasional busi-

ness agent, would be coming to

Paris on Thursday to discuss this

problem with Renault officials.

"They don't want to talk about my future," LeMond said of Re-

nault. "It's a firm offer from Ta-

pie and it kind of secures my future." Tapie was not available for comment Wednesday.

"I'd like to stay with Renault," he said. "If I knew Renault was going to sign me for three more years with the same kind of deal Tapie has offered, I'd sign with them. But if things can't work out with Renault, I'll go with Tapie."

Professional riders occasionally

He denied that his possible

switch to the Vie Claire team reflected any unhappiness with his teammates, especially Fignon, who won the Tour de France for

the second successive year and is

only a year older than LeMond. "Fignon and I are good friends," LeMond insisted. "It's the best

team in the world and Cyrille

Guimard is the best coach in the

world. I've got a lot of friends

SPORTS BRIEFS

Russians Win 2d Match in Cup Hockey

CALGARY, Alberta (UPI) — Sergei Sveulov scored twice and Sergei Makarov added a goal as the Soviet Union edged Sweden, 3-2, here Tuesday night for its second straight Canada Cup hockey tournament victory, while in London, Ontario, Czechoslovakia's Peter Rosol scored with 1:36 remaining to salvage a 4-4 tie with West Germany.

The Russians are in first place after two rounds of the round-robin event. Canada and the United States are second at 1-0-1, while West Germany and Czechoslovakia (0-1-1) are fourth and Sweden (0-2) is last. Routed by Canada in their oreger, the West Germans shocked the

Cermany and Czechoslovakia (0-1-1) are fourth and Sweden (0-2) is last. Routed by Canada in their opener, the West Germans shocked the Czechs by jumping to a 3-0 first-period lead thanks to Helmut Steiger's two goals and goalie Karl Friesen's dazzling play. After Czechoslovakia rallied to a 3-3 tie, West Germany regained the lead on Ernst Höfner's power-play goal at 14:17 of the second period.

Surgery Ends NFL Season for Warner

SEATTLE (AP) — Seattle Seahawk running back Curt Warner, who led the American Football Conference in rushing with 1,449 yards as a

rookie last season, will be lost for the season because of a knee injury, the National Football League club said Tuesday.

Warner suffered the injury untouched; carrying the ball on a sweep, he was making a cut on the artifical surface of the Kingdome during the second quarter of Monday's 33-0 victory over the Cieveland Browns. BASKRYBALL

Noticenst Beskrybeid Association

DETROIT—Staned Kelly Tripueka, forword, to a seven-year confract and visuale

Mas making a cut on the artificial Surface of the Cleveland Browns.

Second quarter of Monday's 33-0 victory over the Cleveland Browns.

Arthroscopic surgery revealed severe ligament damage to his right knee, and full surgery was performed to repair the damage.

Cardinals' Smith Suspended, Fined NEW YORK (AP) - St. Louis

Ozzie Smith

Cardinal shortstop Ozzie Smith was suspended for seven days and fined \$5,000 by the National League late Tuesday for having bumped and knocked down umpire Steve Rippley in a game last week. The league said Smith had appealed both the suspension and the fine, and remains eligible to play pending a hearing. Rippley fell after Smith bumped

him during a game Saturday in St. Louis. As the Cards came off the field in the seventh inning, Smith stopped and said something to the umpire. Rippley ejected Smith and the infielder charged at him. Rippley said contact was made, causing him to fall on his back. Smith, who had disputed two

close Rippley calls at first base, said afterward he was ejected for saying, "Wake up."

ART BUCHWALD The Men of the Year

WASHINGTON — After a had to do when I allowed you to use my name on the dinner committee," I yelled.

"Woody's not asking you to do anything but make a few phone calls to friends to insure the dinner. popular ways of raising money for doesn't go into the red." a worthy cause. The only trouble is "I'm not going to sell any tathat there are so many causes that it bles."

"Well, what about taking one for

want to get involved with. The people who run charity funetions don't take 🖫 🦭 rejection easily. Last spring !

got a call from a guy named Marty, who said he was telephoning for Jonathan

Leverage, presi-dent of the International Chewing Gum Wrapper Corp., who was 'Man of the Year" for what he'd done for the Princess Di Disabled Polo Players Rettrement Home.

Marty wanted to know if I would serve on the honorary dinner com-mittee with Dinah Shore, Howard Cosell, Mr. and Mrs. Henry Kissinger and the ambassador from Sri Lanka along with 100 of Woody's closest friends. He assured me there was no work or obligation

I agreed and stupidly believed that was the end of it.

Three weeks later I got the call from Marty, who said the tables weren't moving and was wondering if I could possibly unload a number of them at \$2,500 each as a favor to my buddy Woody.
"You said there was nothing I

'Raiders of the Lost Ark' To Be Shown on Pay-TV

Unned Press International LOS ANGELES - Paramount Pictures Corp. has sold "Raiders of the Lost Ark" to U.S. pay television, and all pay-TV networks are expected to air it in November. Directed by Steven Spielberg, it

is the sixth highest grossing film in history. A record 650,000 videocassettes have been sold.

woman is now one of the most calls to friends to insure the dinner

yourself."

"I don't want to take a table for \$2,500. I'll buy two tickets and that's it. "All right, but I can't promise

who you'll sit with, because if you don't take an entire table you could get stuck with some awfully tacky people."
"For 500 bucks, I'll have to take

my chances." O.K., now you want to talk about the program?

"What program?" "The printed program honoring chairman of the dinner committee

Woody Wonderful as handed out at the dinner. A full gold page tribute costs \$5,000, a

silver page \$3,000, and a black-and-white page \$1,500." "I don't want an advertisement in the program." "If you don't take a page we can't invite you to the Platinum Circle reception after the dinner in

"I don't care about going to the reception. I'm not even going to the

"If you don't show up Woody's going to be terribly hurt. He told me personally he was hoping to see you there."

As luck would have it I ran into Woody the next day and said, "I'm sorry I can't be at your dinner next week at the Waldorf."

"What dinner?" "The one where they've made you 'Man of the Year.' "
"Holy smoke, did my staff get

me into another one of those deals without telling me?" "Didn't you even know you were doing a benefit for the Disabled

Polo Players Retirement Home?" "Who can keep track of what my stupid manager lines up for me?"
"Marty said you told him it was the greatest honor you had ever gotten in your life."
"Who's Marty?"

"The guy who called and said you'd never talk to me again if I didn't come to your dinner."

Everything Is Going Right for Sigourney Weaver

By Stephanic Mansfield
Washington Post Service
JEW YORK — Sigourney Weaver.

The name alone would be enough to conjure up a soigné, reed-slim 6-foot siren, but it's the face that stops traffic as she glides into her favorite West Side bakery for breakfast. Translucent skin, patrician nose, high forehead, tousled, naturally wavy auburn hair and eyes like two very expensive chocolate-covered caramels. Imported. From another planet.

Smart, strong, on the cusp of superstardom, currently appearing in the screen's biggest summer smash, "Ghostbusters," and on Broadway in David Rabe's sold-out hit play, "Hurlyburly," directed by Mike Nichols.

On top of that she's getting married in October to Jim Simpson, a theatrical director, who at 28 is six years her junior, If that wasn't enough to light up the envy meter, she was just named one of America's 10 most beautiful women by Harper's Bazaar. It has definitely been her year.

What about all this attention and romantic bliss. Has envy suddenly become a

"I hope so," she said, eyes narrowing, chin jutting out, a small smile creasing her lips. Actually, her friends are delighted. "Because it shows that if I can do it, so can

Weaver may be the only actress in New York who has her very own linoleum-topped table at one of Manhattan's finest breakfast spots. She ordered scrambled eggs and bacon, poured two fingers of cream into her coffee, sat back into her favorite vinyl booth and sighed over the

clinking of coffee cups.
"I think people think it's funny that I have this big blockbuster hit and I'm in a play and I'm getting married," she said. "I think they think it's too much. That it's unfair."

She was raised in Manhattan, educated at the tony Ethel Walker School, received her BA from Stanford and her master's degreefrom the Yale Drama School. At 14 she changed her name from Susan to Sigourney. "It was quite cold-blooded of me," she said. "I just liked the name." She had spotted it in F. Scott Fitzgerald's "The Great Gatsby."

Her father, Sylvester (Pat) Weaver, served for a time as president of NBC and is known as "the father of the TV talk show." His credits include "Your Show of Shows," "The Tonight Show" and "To-day." He quit in 1956 and tried unsuccessfully to start a fourth network. He is now a communications consultant in California.

His daughter went through typical adolescent phases, from Beatlemania to week-end revolutionary to living in a tree house dressed as an elf. After college, she dabbled

Sigourney Weaver in 'Ghostbusters': This appears to be her year.

in modeling, "I tried it for a summer, but I was so bad at it, I gave it up. I was bad at every aspect of it. I was bad at being silent and pretty and I was bad at being so into the look. I was bad at every single part of it except the money." She bites into a strip of bacon. "I hated the way they treated me

and the clothes were squarola."

The theater beckoned. There was, she says now, "always the feeling that I'm not being ambitious enough or that I'm moving too slowly. My parents, of course, felt that if I wanted to go into films I should go out to Hollywood when I was 22 or 23, and I really wasn't interested in doing it their

Doing it her way, she became a off-Broadway stage actress and sometime writer who has made five films in the past five years; two commercial hits, two critical successes and one flop. In Ridley Scott's 1979 sci-fi thriller "Alien," she won raves as Ripley, the last officer left on board the monster-invaded spaceship Nostromo. One of the last sequences has Weaver strip down to her underwear, a scene that still provokes a hefty amount of fan mail.

Then came a Newsweek cover, followed by a starring role in "Eyewitness" opposite her good friend William Hurt. In Peter Weir's "The Year of Living Dangerously," to go for what I want. Everyone has a she hit her stride as the seductive, mysteri-

ous British foreign service officer who falls in love with an Australian journalist, played by Mel Gibson. She was cast in her first comedy role opposite Chevy Chase in "Deal of the Century," generally regarded

Weaver leaned forward and explained that she always knew she would be successful. "I do believe there are certain fairy god-mice or something. Guardian spirits that have watched over me. I certainly feel protected. I really do. I always had this feeling that I would be able to accomplish what it was I could accomplish." Is her privileged background responsible for that feeling?

"I certainly know a lot of people who came from the same upbringing that I did who don't have that, so I don't think you

can just write it off to that.
"I still wonder what it is. For instance, I was in school [Yale Drama School] with Meryl Streep. Meryl was much more advanced than we were in terms of knowing what she wanted and her drive and her persistence. She was ready to be succesful then. The rest of us were just messing around. There comes a certain point in

you can't expect too much from yourself.
There are probably people in everybody's life who seem to have gotten everything they want done sooner.

"For the first time in my life I'm hearing

from friends I went to school with who say, 'You've been working so hard and so long and look how it's paid off for you.' I'm amazed. I was like hitting my head against a wall for years while they were making money and getting married and things like that. It seems strange to me and wonderful that they're suddenly acknowledging me. for the fact that I've been on one track for a long time.
"In fact, I would say from my upbring-

ing, I would have a very cynical attitude toward this business because my father's career was very up and down, and actually that was a gift to me in a stange way because I knew I couldn't count on the business being fair to me or anything being fair. That you're only as good as what you did that day." Weaver is known for her professional-

ism, and also for her ability to take chances. During rehearsal of "Hurlyburly," she improvised one particular scene by straddling William Hurt while beginning to undress, a move that prompted her co-

star to mutter, "You're so brave."
"I don't really think it's brave," she shrugged, "I don't think I'm cowardly, but things I choose to do —" Her voice trailed off. "I would say it took more bravery in the beginning when I was being offered things I didn't want to spend my life doing. Nothing wrong with TV series, but I knew I wasn't in the business to do it."

Weaver said she was not terribly good at handling celebrity status.

Fighting off the fans who cluster at the stage entrance is a daily headache. "I'm not terribly good at it. You have two shows a

day and you deal with it four times in one day and I think that's asking too much, frankly. Her next project is a film she is cowriting a with friend and former Yale classmate, the playwright Christopher Durang, to be directed by Ivan Reitman ("Stripes," "Meatballs," "Ghostbusters"). Her attention was suddenly diverted by

a tall, dark-haired young man in a T-shirt, lugging a shopping bag. It was her fiance, who had come to collect her. He smiled, shook hands and sat down. Yes, he said, he knows he's the luckiest guy in town and all his friends really like his bride-to-be, but what's really neat is getting to know Si-gourney Weaver the person. "Beyond the myth," he said.

Someone observed that Rabe's "Hurlyburly" was a play about people not living up to their potential. Weaver smiled screnely.

"I've gone beyond my potential."

\$4.95 Million Is Sough For Robert Burns's Sent

A California woman is asking \$4.95 million for the seal of the poet Robert Burns, but the Burns Federation in Scotland says the seal is worth no more than £12,000 (\$15,600). "It is something we would very much like to have back in Scotland, but we certainly haven't got that kind of money Samuel Gaw of the federation in Bridge of Weir said of Balls True Eksbury's asking price. Gaw said he would approach the Burns Mus-um at the poet's birthplace coltage in Alloway, as well as local amhorities, to see whether a reasonable offer for the seal can be made Burns died in 1796. The federation is an association of individuals and more than 300 active Burns chibs around the world who maintain memorials to him. The seal, used to mark sealing wax on letters, is a small piece of white topaz. п

A Roman Catholic priest says he has forgiven an Irish airline pilot whose anti-Catholic joke was overheard by pilgrims. Ireland's pational airline, Aer Lingus, suspended the pilot and apologized to a Roman Catholic bishop about a remark made on the plane's cabin address system as a priest regited the rosary. The pilgrims on the Aug. 28 flight from Dublin to Lourdes, France, reputed by Cath-olics as a site of miraculous cares, heard the pilot say: "You Catholic bastards, stop the rosary." The priest, Canon Patrick Murray of Athlone in central Ireland's County Westmeath, said. "I believe in forgiveness. That is my business as a priest, and I would certainly not want to carry this matter any further." The airline refused to identify the pilot, who said he was only oking with his colleagues on the flight deck.
